CODEMARK[™]

Product description

The Nuraply 3PG Green Roof Membrane System is a double layer torch-on modified bitumen sheet membrane system, comprising adhesives and a basesheet over which a root resistant capsheet is heat adhered. Seams are heat welded. The basesheets are supplied in coils 10m x 1m wide while the capsheets are supplied in 7.5m x 1m wide coils. The Nuraply 3PG Green Roof membrane system may be installed directly onto plywood or concrete or for a Nuratherm Warm Roof it may be installed onto Enertherm boards attached to plywood, concrete or metal travdeck.

Product purpose or use

The Nuraply 3PG Green Roof Membrane System is used for waterproofing roofs and decks, especially low-slope roofs and decks, with plant material installed upon a drainage mat above the membrane. The minimum slope is dependent upon the substrate Refer attached table over

CERTIFICATE OF CONFORMITY

This is to certify that

The Nuraply 3PG Green Roof Membrane System

Complies with the New Zealand Building Code:

Performance Clauses B1.3.2 and B1.3.3 (e) and (m) Performance Clauses B2.3.1 (a) and B2.3.2 Performance Clause E2.3.1 . E2.3.2 and E2.3.6 Performance Clause F2.3.1. Compliance with other clauses have been considered and found not applicable.

Subject to the following:

outside the scope of this certificate.

Limitations of use -

B. Accessories, componentry, cladding and finishing systems to comply with that specified in the Nuraply 3PG Green Roof membrane technical manual 2016 Edition 4, and the Nuraply Waterproofing Membrane Building Product Quality Plan 2015 v2; C. Installation shall be performed by Nuralite Waterproofing Ltd trained and approved installers, who shall be superwww.ias-anz.org/registe vised by a suitably gualified Licensed Building Practitioner;

D. Installation and maintenance - where required - of the Nuraply 3PG Green Roof Membrane System, shall be in accordance with the Nuraply Waterproofing Membrane Building Product Quality Plan 2015 v2 available on request and the QA sheets included in the 3PG Roof Garden membrane technical manual 2016 Edition 4.

Conditions of certification -

E. The Building Product Quality Plan for the Nuraply 3PM Roofing Membrane system shall be reviewed and subject to audit at their head office and building sites by the issuer at least once a year:

- F. This CodeMark Certificate shall be revalidated on an annual basis:
- H. This CodeMark Certificate is subject to S15 of the Building Product Certification Regulations 2008.

Technical information:

Information that forms part of this certificate or the basis for certification is available from the issuer on request and may be subject to a fee.

Fynlana	tion of complianc	e with Building Coo	lo critoria undo	r = 269 (1) of the	o Building Act	2004		

Clause B1.3.2 Compliance has been established by testing to ensure that tensile strength, elongation, compression and seam strength are adequate. Clauses B1.3.3 (e) and (m) Compliance has been established with testing to ensure resistance to water absorption, hydrostatic pressure, differential movement over substrate joints are adequate.

Clause B2.3.1 (a) & (b) The membrane is part of the envelope building element and assessed for 50 and 15 year durability period.

Clause B2.3.2 No building elements are over elements with lesser durability and satisfy this criteria.

Clause E2.3.1 The roof membrane system will repel water from entering building and shed precipitated moisture and melted snow.

Clause E2.3.2 The membrane system has been tested for water absorption, vapour transmission, hydrostatic pressure and joint seam strength to satisfy this requirement.

Clause E2.3.6 The membrane system will allow excess moisture present to be dissipated at the completion of construction

Clause F2.3.1. No gases liquid or particles are emitted by materials that could give rise to harmful concentrations on surfaces or in an atmosphere of any space.
